EXECUTIVE SUMMARY

I am a fresh graduate in Information Systems with a strong interest in web and mobile development. I enjoy working on technology-based solutions that improve efficiency and user experience. Through academic projects, I have gained hands-on experience in building applications and managing data. I am a detail-oriented and fast learner, with good problem-solving skills and a passion for continuous improvement. I work well both independently and in teams, and I am eager to contribute and grow in a professional environment.

EDUCATION

Bachelor's Degree in Informatics Engineering, Universitas Tanjungpura   2019 - 2025

- GPA: 3.70 / 4.00
- Relevant Coursework: Web Programming, Mobile Application Development, Software Engineering, Database Systems, Data Structures and Algorithms, Object-Oriented Programming, Human-Computer Interaction.

WORKING EXPERIENCES

Field Surveyor, BPJS Ketenagakerjaan (UMKM Survey Program)   Jun - Jul 2025

- Conducted field surveys of 1,000+ micro, small, and medium enterprises (MSMEs) using a web-based application provided by BPJS Ketenagakerjaan.
- Distributed official survey letters to business owners to facilitate data collection.
- Collected and submitted data accurately within a strict deadline, ensuring 100% target completion.
- Engaged directly with various business owners, enhancing communication skills and data handling in real-world environments.

ORGANIZATIONAL EXPERIENCES

Consumption Team, PMKM (Student Community Service Program)   2023

- Planned food supply needs and daily meal schedules for participants. Managed budgeting and coordinated with local vendors to ensure timely meal distribution. Contributed to the program's success through effective resource and time management.

PROJECTS

- **Library Book Borrowing Website** — *University Project*

  Developed a simple web application for managing library book loans using PHP, HTML, and CSS. Features include book inventory, loan tracking, and return system.

- **Landing Page Design** — *University Project*

  Created a responsive landing page using HTML, CSS, and Bootstrap. Focused on clean layout, mobile responsiveness, and basic UI/UX design principles.

- **WebGIS for Places of Worship Data** — *University Project*

  Built a WebGIS application using CodeIgniter, Leaflet.js, HTML, CSS, and Bootstrap to display spatial data of religious facilities. Includes map interaction, filtering, and responsive design.

- **MBKM Program Data Management Website** — *University Project*

  Developed a web-based system for managing Kampus Merdeka (MBKM) student participation using CodeIgniter and Bootstrap. Features include data input, progress tracking, and administrative access.

- **Airport Taxi Sharing** — *University Project*

  Developed an application with the idea of improving the efficiency of airport taxi services. Developed a mobile app using Flutter (frontend), Node.js + Express (RESTful API), and Firebase (notifications & cloud storage). Features include real-time taxi booking, driver-passenger matching, interactive maps for taxi tracking, and order status updates.

SKILLS

Language:

- Indonesia: Native
- English: Intermediate (TOEFL ITP 457)

Technologies:

- Flutter
- Node.js & Express (RESTful API)
- React.js
- Git & GitHub
- MySQL
- PHP
- CodeIgniter
- HTML, CSS, Bootstrap, Tailwind
- Firebase (FCM, Cloud Storage)
